

IN THE SPECIFICATION:

Please amend the specification on page 15, lines 13-15 as follows:

The turning bar holders 11a and 11b of the turning bars 1 and 2 differ only by the mount ~~[[14]]~~ 13 formed on each of the turning bar holders 11a and 11b, which is shaped like an eye that is open on one side.

Please amend the specification on page 18, lines 14-16 as follows:

They form, furthermore, a screw joint each with the same adjusting spindle ~~[[17]]~~ 19, i.e., they are adjusted together and maintain their distance measured in the direction of the first guide 21 during the adjustment.
